

Climate Restoration Resolution

- Whereas;** Humanity has an obligation to future generations to restore and maintain a safe climate in which humans have survived long-term;
- Whereas;** HWA FOUNDATION-Pakistan's mission statement is "To improve the socio-economic conditions of marginalized community groups and increase their access to all resources, rights, and institutions through an integrated community development approach, with a strong focus on nutrition advocacy to ensure holistic well-being and sustainable development."
- Whereas;** Current CO₂ levels are already at 425 ppm and are expected to rise to 450 ppm or higher by 2050, based on current Paris Agreement estimates;
- Whereas;** The International Panel on Climate Change (IPCC) has stated that temperatures corresponding to CO₂ levels of 450 ppm or above will lead to grave damage to the ecosystems;
- Whereas;** The human species has never before lived with sustained atmospheric carbon dioxide (CO₂) levels above 300 ppm;
- Whereas;** Climate Restoration is the goal of reducing atmospheric CO₂ levels to a pre-industrial level (at 300 ppm or below) such that when Net Zero Emissions are reached humankind will have a sustainable planet to inhabit and pass on to future generations;
- Whereas;** There is no climate justice without climate restoration because the poor are the first and most impacted by climate change;
- Whereas;** Climate Restoration will benefit the people of the world by reducing loss and damage from floods, storms, droughts, and wildfires, while producing positive effects on human and ecosystem health;

Whereas; The Climate Restoration Alliance connects and empowers people and organizations committed to restoring a livable climate, with carbon dioxide levels close to pre-industrial by 2050;

Therefore; [ORG NAME] hereby resolves to join the Climate Restoration Alliance, invite others to join as well, and take action to make Climate Restoration an idea whose time has come;

And also; We call on our global leadership to adopt “Restore and Stabilize Greenhouse Gas Levels” as our Common Climate Goal.
